

Prof. Bin Ren

Xiamen University, China

Bin Ren is now a Changjiang Distinguished Professor in Department of Chemistry and vice director of the State Key Laboratory of Physical Chemistry of Solid Surfaces at Xiamen University. He obtained his bachelor and Ph. D in the same department. He was an Alexander von Humboldt fellow in Fritz-Haber Institute, Germany. He was awarded the National Science Fund for Distinguished Young Scholar Fund, and the National high-level talents special support plan. He has published over 200 scientific paper with citations over 11000 times. He is now an associate editor of Analytical Chemistry (ACS). His research field is on surface-enhanced Raman spectroscopy, tip-enhanced Raman spectroscopy and electrochemistry, and their application in studying the fundamental aspect of surface and interfaces of energy and bio-related systems.
