

## Exhibitor Information

<b>Name of Exhibitor</b>	Chroma Technology Corp.	<b>President</b>	Paul Millman
<b>Address</b>	10 Imtec Lane, Bellows falls, VT 05101	<b>Country</b>	US
<b>Tel</b>	802-428-2500	<b>Fax</b>	802-428-2525
<b>Email</b>	eli@cn.chroma.com	<b>Website</b>	www.chroma.com
<b>Contents of Exhibit</b>	Filters and light source		

### Introduction

Chroma Technology Corp. is a manufacturer of interference filters for the ultraviolet, visible and near-infrared portions of the spectrum, including bandpass, multiple bandpass, and long- and short-pass filters, as well as beamsplitters, dichroic mirrors and laser rejection filters. We specialize in precision spectral control, including extra high signal-to-noise ratio filters and those with rapid cut-on and cut-off profiles. The manufacturing process involves precisely depositing in a vacuum, extremely thin layers of two or more materials on a glass or similarly transparent substrate.

With 26 years of experience serving the scientific, biomedical and photonics communities, we know how to design and deliver optical filters that do precisely what our customers need. Whether it's long-term, high-volume production or a one-off custom solution, we create exactly what you need to help make your next product a success.
