

Exhibitor Information

Name of Exhibitor	JASCO Corporation	President	Toshiki Nakamura
Address	2967-5 Ishikawamachi, Hachioji-shi, Tokyo 192-8537, Japan	Country	JAPAN
Tel	+81 42 649 3247	Fax	+81 42 649 3518
Email	inbox@jascoint.co.jp	Website	www.jasco.co.jp
Contents of Exhibit	High Speed and High Resolution Raman Imaging System		

Introduction

With 60 years of experience in spectroscopy, JASCO is a global leader in a wide range of innovative technologies offering the best solutions for RAMAN analysis with a complete range of product lineup.

The NRS Series for confocal Raman imaging microscopy include the easy but powerful NRS-4500 covering a wide range of VIS to NIR, the sophisticated NRS-5000 offering higher spectral and spatial resolution with DSF (Dual Spatial Filter), and the research grade NRS-7000 with 500mm spectrograph and poly-dispersive options.

In addition to the capability of high spatial resolution, the rapid acquisition with automated system control and minimal optical adjustments assure the consistent and maximum performance on JASCO micro-Raman system, on which the high quality, undistorted Raman image can be obtained.
