

Exhibitor Information

Name of Exhibitor	METROHM DROPSENS	President	YoungYoul Kwon
Address	#402, Sosa-ro 160gil 40, Bucheon-si Gyunggi-do, 14766, S.Korea	Country	S.Korea
Tel	032-341-4265	Fax	032-341-4266
Email	ohmin@egtechnology.co.kr	Website	www.egtechnology.co.kr
Contents of Exhibit	SPELEC RAMAN Instrument		

Introduction

Metrohm DropSens is an Innovative Technology-Based Firm that offers the researcher, through an intensive and **continuous R&D**, innovative electrochemical tools with the aim of giving flexible, user-friendly, portable and effective products.

We have focused in the design and development of portable [potentiostats](#) which offer the main electrochemical techniques while retaining the accuracy of bigger instruments, offering an easy-to-use computer interface. The combination of electrochemical and optical techniques allows performing **spectroelectrochemical** measurements. [Spectroelectrochemistry](#) is a useful solution for many different research fields, including materials characterization, photochemical energy conversion or photovoltaic cells. [SPELEC](#) instrument combines a bipotentiostat/galvanostat with a spectrometer and a light source. An [integrated solution](#) with dedicated software and accessories is now available. Also [\$\mu\$ STAT ECL](#) allows you to perform synchronized electrochemical and electrochemiluminescence analysis with [screen-printed electrodes](#).
