

Exhibitor Information

Name of Exhibitor	Nanophoton Korea	President	SATOSHI KAWATA
Address	3 dong 202 ho,15 Pangyo-ro 228 beon-gil,Bundang-gu,Seong nam-si, Gyeonggi-do, Korea/13487	Country	Korea
Tel	031 703 4525	Fax	031 703 4526
Email	info@nanophoton.kr	Website	www.nanophoton.net
Contents of Exhibit	RAMAN Imaging System		

Introduction

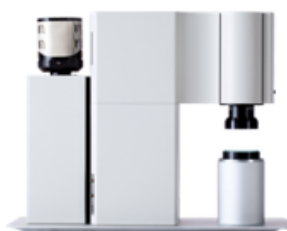

Nanophoton is a manufacturer of high performance analytical and imaging instruments with major focus on innovative Raman systems by using the most updated nano- and photonics technology. Our instruments include high performance Raman Imaging Systems, Ultra-fast Raman Screening Systems as well as TERS Microscope for most demanding applications. These products are integrated into a broad range of solutions for academic research as well as industrial applications.

High performance Raman Imaging System

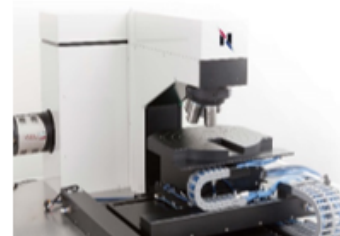

Sophisticated high performance
RAMANforce

The highest performance Raman of Nanophoton has evolved dramatically. Its perfect resolution and sensitivity provides the best Raman imaging ever.

Fast screening system
RAMANview

Fully new Raman Imaging with a Larger View. RAMANview has the maximum size of Raman image of 2.5cm.

Wafer analyzer
RAMANdrive

Equipped with our dedicated 300 mm stage, RAMANdrive gives you an ultra-fast, highest resolution analysis of the whole wafer with unique stability and accuracy.
